"Innovative Solution for Traditional Maintenance"

Problem

Electricity Distribution Company

Traditional Maintenance Process

1

Contractors or Field Teams takes the photos.

2

Maintenance Engineers Analyze The Photos Taken One by One.

3

Maintenance Engineers Classify These Photos for Maintenance Planing.

4

Creates the Job Order According to Classification.

Problem

Process Management is Slow.

Processing 40000+ photos collected monthly by hand creating a barrier for effective planning

Managing Resources Wastefully More

Crippled planing affecting management of human and maintenance budget resources negatively

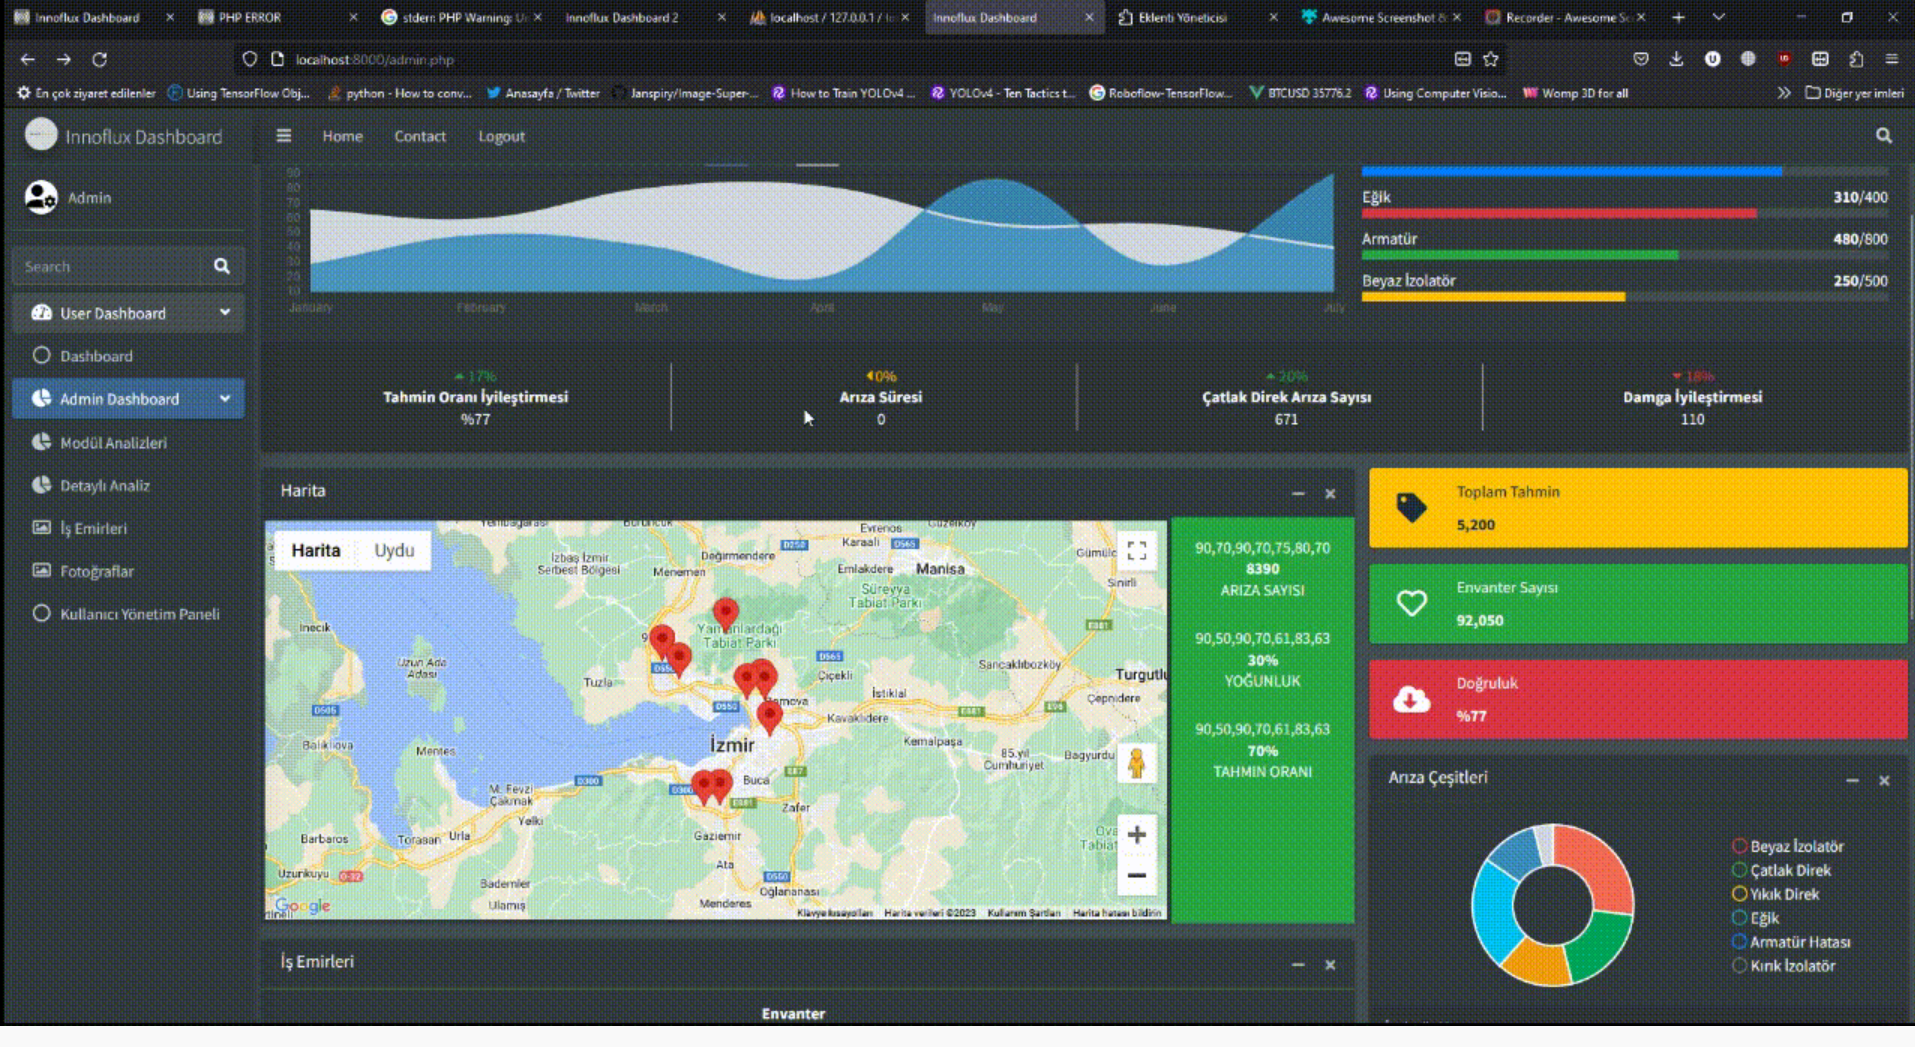

Dependency of Human Resources

Handling the photos one by one with human team is slow and costing extra then a computer every time.

Solution

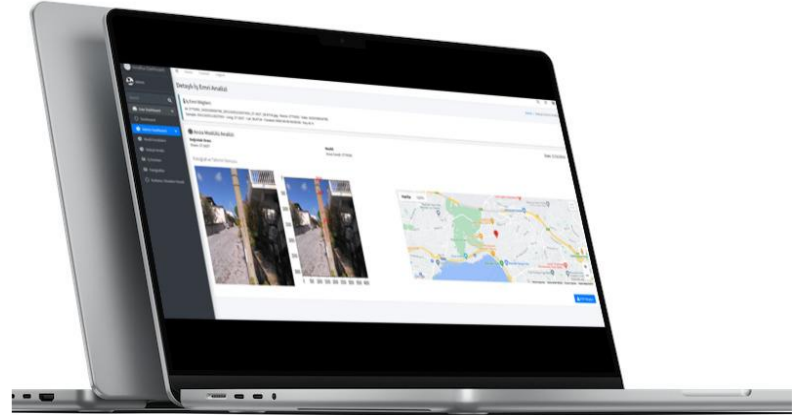

**Central Image Processing Software
Covering All Inventories in the Electric
Network**

Solution

- **With ASE Software ;**

Effective, Fast, and 7/24.

- **With ASE Software ;**

Predictable Maintenance Process
Independant from Human Resources

Effective Maintenance Planning

Reducing Need for Staff and Engineer
Force Required in the Field

Business Model

We are working towards a comprehensive solution.

We walked the first steps.

We started to sell products to Semi-Digitalized Electricity Distribution Inc.

Next step;

Then turn it into SaaS and provide service without installation.

**Product Sales and
Licensing**

Market & Competition

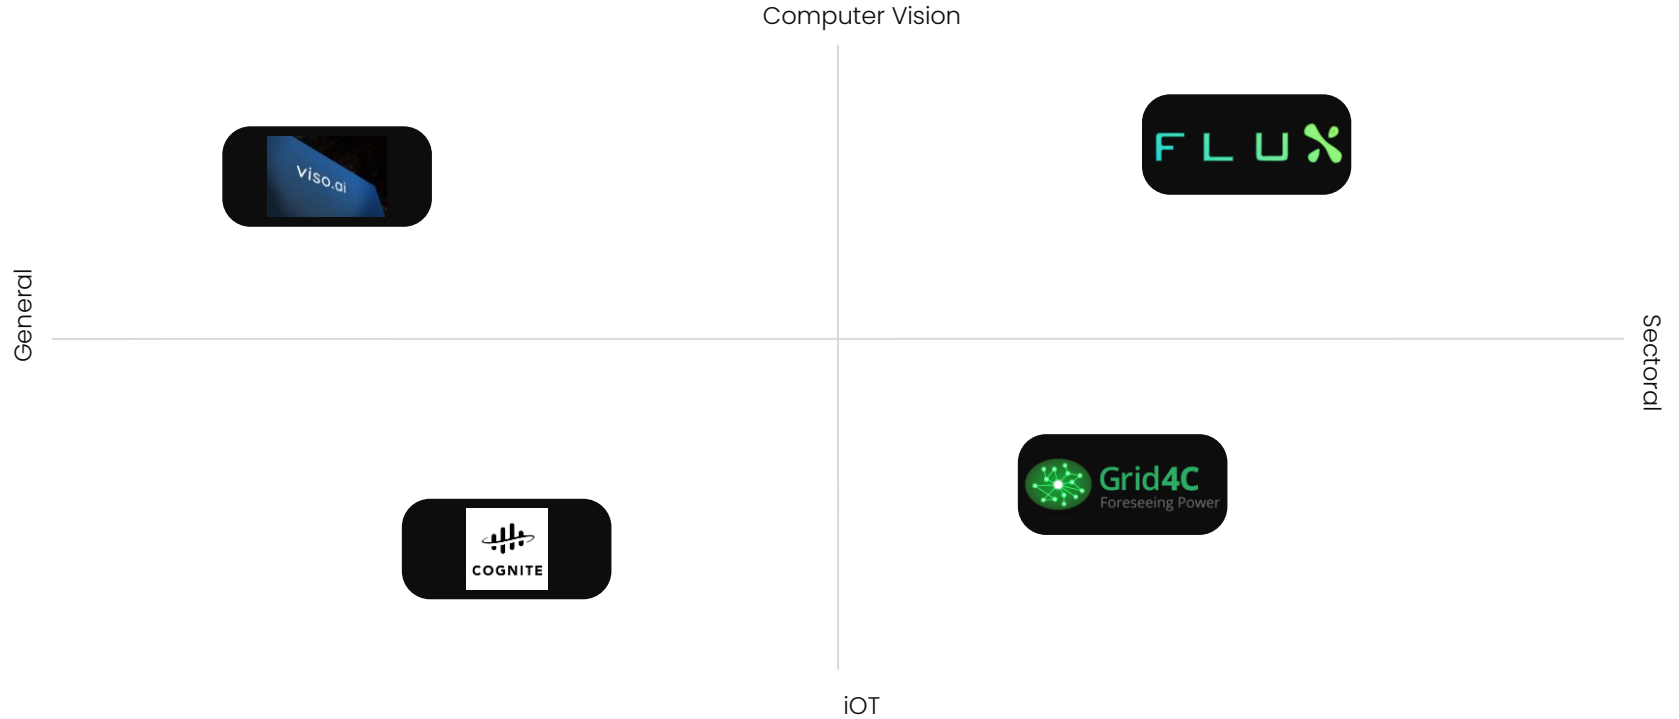

Market Opportunity

Electricity Distribution Network Maintenance and Energy Company investments are growing rapidly and the global market is expected to reach 300 billion dollars by 2030. The increasing complexity of networks and the demand for reliable and efficient energy supply underline the importance of effective maintenance. Innoflux's innovative software offers a unique solution to the woes of traditional maintenance methods, making it an attractive option for customers looking to optimize their operations and reduce costs. As the energy industry continues, Innoflux is well positioned to meet the growing demand for efficient and reliable maintenance solutions.

• Competition Table

Funds and Usage

Our Way...

Till Today,

We productized our software.

- We sold 1.6 million TL worth of sales.
- We started to set up the SaaS infrastructure.
- We are working on dissemination

In Progress...

We want to create and consolidate our position in Europe and Turkey.

- To complete the SaaS infrastructure of our product.
- Establishing a sales, marketing and support team.
- We want to expand abroad.

Thank You.
For your time.

We would like to thank you in advance for your contributions to us on this path and for your future contributions to reach the Energy Network and Investor Networks in Turkey, and the World.
